

Plattform der Sustainable Convergence of Iranians – S.C. Iranians Hamgaraie Paydare Iranian-HAMPA

Dear Iranians,

When we take a look at the history of Iran, we will see that our society was only able to thrive and develop itself in times, when the different parts of society came close together and acted as one, in solidarity and regardless of their political views and religious affiliations.

Now that the people of Iran literally demand a further development, it seems as such a time has come again and therefore it is necessary to accompany this process of national convergence and thus build a ground for its sustainability.

In thankful corporation with all previous efforts we want to create a space called “Hamgaraie paydare iraniyan” – Platform of sustainable convergence of Iranians – in short: HAMP A, and we would like to invite all Iranians, who think of such a space in the sense of good thoughts, good words and good deeds , to be part of this process of convergence. Because only empathy, cooperation and coordination can lead us to our mutual goal: the development of Iran.

The establishment of HAMP A is our commitment to the protection and realization of the human rights, civil rights, and the development of individual and societal freedoms, the defense of the independence and integrity of Iran. Our goal is to be part of the cultural development, the progress of Iran and the all surrounding empathy.

HAMP A is an independent, civil institution, whose members all have the same rights.

The fundament of this space is mutual respect and general humanity and moral. Those who agree with the basics of HAMP A and accept the strategies and approved rules can be part of this space as a convergent member.

All activities of HAMP A are open and transparent and will be published on the official website. The responsibility for these activities lies within the coordination workgroup.

HAMP A commits itself to analyze the extent and specialties of sustainable convergence, to recognize obstacles and to find ways to overcome them. This commitment includes to introduce HAMP A to the Iranians and to invite them to be part of it, to create work groups, hold conferences and discussions and to publish all of their results.
